

Your Best Self

Simple solutions at BLLaC Beauty Studio

Anointed the “Eyebrow Queen of Litchfield County,” Pilar DeMann knows if the eyes are the windows to the soul, then the eyebrows are the frames. The LA native opened Pilar BLLaC, a beauty studio in Washington Depot, in July 2019 and has dedicated her professional life to helping real world women look their best. In order to do so, she designed a simple routine that everyone can follow.

Tell us about your signature routine. BLLaC is an acronym for Brows, Lashes, Lips and Cheeks and is designed to be “The Little Black Dress of Makeup (TM)” —all you need for a simple, everyday routine. Five minutes each morning, like brushing your teeth.

Brows: Brush, set, and powder

Lashes: Curl and apply mascara

Lips: add color

Cheeks: add color, and you’re out the door!

What services do you provide at the studio? I offer eyebrow shaping, tinting, and microblading, eyelash tinting, brow lamination as well as full-service makeup applications, makeup lessons, and my favorite—a makeup bag clean out—where you come to my studio with all your makeup, and we clean it out. Lastly, I offer LED light therapy skin treatment using LightStim professional. My light is dual, so it treats acne as well as fine lines and wrinkles. It heals the skin and wakes it up, leaving it looking alive. I also carry a highly curated variety of skin products.

What exactly is microblading? Microblading is an effective, more permanent alternative to makeup and tinting. Much like tinting, it creates the illusion of a more complete looking eyebrow. I deposit pigment into the skin much like a tattoo but not as deep, so it is considered semi-permanent. My specialty is very

soft, very natural-appearing eyebrows. I am licensed in Connecticut and hold six certifications. After a consultation appointment, microblading is a two-step process—about six weeks apart, and once complete, can last nine to 14 months before it needs to be retouched. Eyebrow tinting lasts roughly three to four weeks.

Is it true that you’re developing your own makeup line? Yes! The formulas are being made in Italy, and are fragrance free, sheer, and delightful. We are hoping to launch makeup line in Fall 2020.

Can you share one insider beauty secret? One of my secrets is changing skin care and makeup each season and using a powdered milk to exfoliate my body prior to making that switch. I encourage everyone to take care of your skin and learn to even wear a little lipstick to make your face brighter!
