

LightStim[®]

PROFESSIONAL

Leading the Way in LED Light Therapy

Reputation

LightStim is committed to earning your trust and maintaining a reputation for integrity and reliability. With nearly two decades of experience, patented technology, certifications and FDA clearances, LightStim is the #1 LED Light used by dermatologists, plastic surgeons, health care, skin care, and wellness professionals.

Quality

All products are made in the USA using top quality materials at our FDA, ISO and Health Canada certified facility in Irvine, California. LightStim devices are designed to last a lifetime.

Technology

LightStim MultiWave® Patented Technology enables our Lights to emit multiple wavelengths (colors) of light at the same time to achieve industry-leading results.

Service

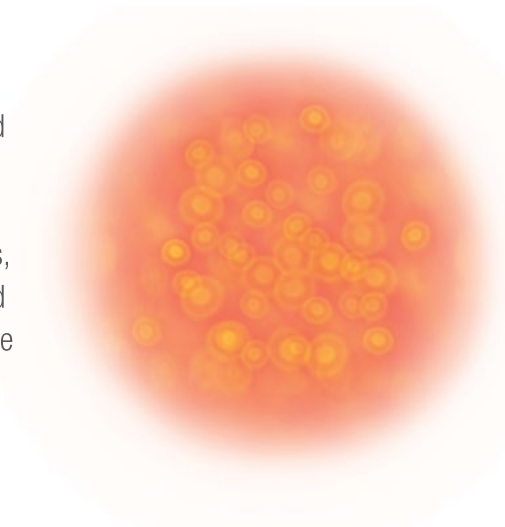

With licensed skin care professionals on staff, customer service and satisfaction are top priorities of every LightStim employee, and are at the heart of our success.

Brand

Many clients ask for LightStim by name because of the abundance of positive publicity, customer reviews, and testimonials from respected doctors, surgeons, and estheticians across the country.

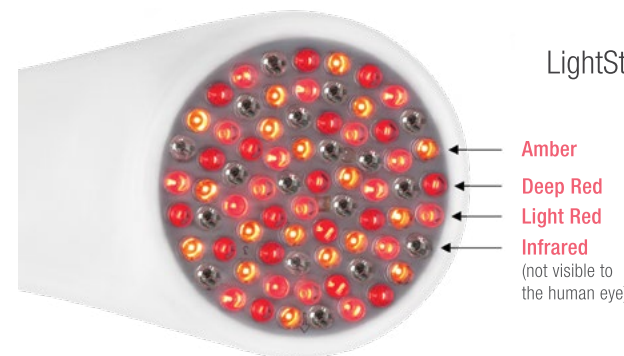

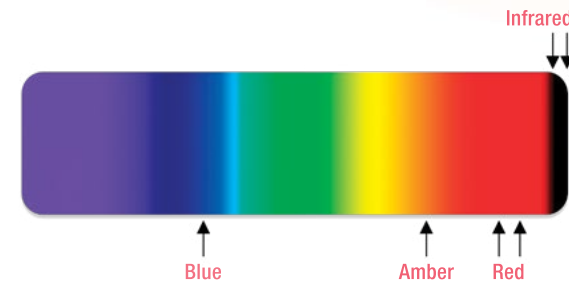

LEDs are Therapeutic

LED stands for Light Emitting Diode, which is a tiny computer chip encased in glass. Each LED wavelength (color) of light provides unique therapeutic benefits. LED is non-invasive, painless, requires no recovery time, and is good for all skin types. LightStim devices are engineered to emit a soothing, gentle warmth.

How LED Light Therapy Works

Like photosynthesis, whereby plants absorb and convert sunlight into energy they can use to grow and thrive, human skin and body tissue work in the same way to absorb therapeutic light emitted by LEDs and use it as a source of energy to stimulate the body's natural restorative processes. LightStim emits UV-free beneficial light rays that can help reduce and eliminate fine lines and wrinkles, destroy acne-causing bacteria, and assist the body in its inherent pain-relieving process.

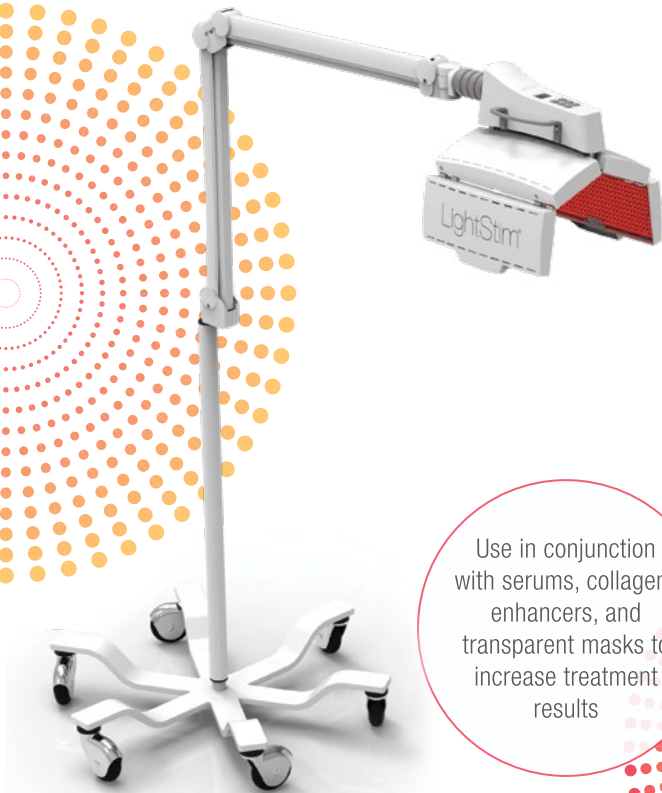

Professional Anti-Aging Light emits four wavelengths

LightStim MultiWave® Patented Technology

LightStim has advanced NASA's LED technology to a new level, developing LightStim MultiWave® Patented Technology. This unique capability enables our Lights to emit multiple wavelengths simultaneously for dramatically greater results in a significantly shorter treatment time.

LightStim ProPanel Lights

Whether you are in a boutique salon, medical spa, or clinic, the LightStim ProPanel brings your treatment room to a bright, new level using proven LightStim technology.

Use in conjunction with serums, collagen-enhancers, and transparent masks to increase treatment results

LightStim Professional LED Bed

LightStim LED Bed is a soothing, natural and non-invasive treatment that promotes total body wellness and peak physiological function by utilizing the power of LightStim MultiWave® Patented Technology.

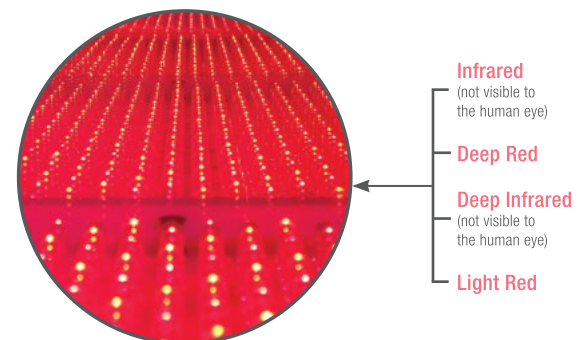

LightStim Professional LED Bed

The LightStim Point of Difference

- FDA Cleared for the temporary relief of minor muscle and joint pain and stiffness, arthritic pain or muscle spasms, the temporary increase in local blood circulation, and the temporary relaxation of muscles
- The first LED Bed to gain Over-The-Counter FDA Clearance
- Composed of 18,240 LEDs designed to rejuvenate, repair and energize every cell in the body
- Full body-sized bed: 86" length (including headrest), 40" width, and 18" height
- LED Light Therapy is a non-invasive and natural treatment with over 200 medical and university studies showing no negative side effects
- Designed and manufactured in the USA
- LightStim devices have been used and recommended by Medical Doctors and Health Care Practitioners for over a decade
- LightStim MultiWave Patented Technology simultaneously emits multiple wavelengths (colors) of light. These wavelengths of light work together to increase local blood circulation, so your body can naturally relieve pain and promote total body wellness.

A Look Into Our Latest Publicity

Testimonials From Our Loyal LightStim Professionals

“After treatment with the LightStim Anti-Aging Panel Lights, Clients are experiencing a glow that lasts for days. The Combo Panel Light has accelerated the time of decreasing acne in our Clients. After using the LightStim Anti-Aging Lights, I always get compliments from people saying I look radiant and beautiful, like I’m lit from within.”

Kate Somerville
 Founder and Creator of Kate Somerville Skin Health Experts Clinic & Kate Somerville Skin Care Collection

“I consider LightStim MultiWave Patented Technology and the overall quality of standards of LightStim products beyond reproach in comparison to all of the other devices I have used in both esthetics and naturopathic care. The attention given to the development, training, and technology is stellar and the equipment is very high quality.”

Dr. Erin Madigan-Fleck
 Owner of Naturophoria Aesthetic & Wellness Center and DermaEducationTV

“The results are amazing and the clients like the relaxing addition of an LED to cosmetic procedures. We use the LED in facials, post-microdermabrasion, post-laser, and in addition to microneedling. We have also found LightStim LED to be a vital component to our ongoing aesthetic educational programs. We have seen the value firsthand on how it can be incorporated into cosmetic medical procedures to both promote recovery and enhance results.”

Terri Wojak
 True U Education, President and Director of Education

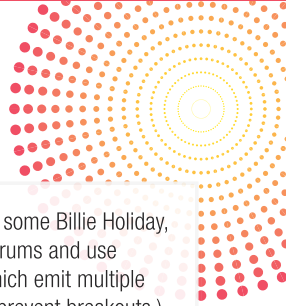

“LED treatments are in high demand by skin care professionals and LightStim delivers above and beyond needs and expectations for increased business, growth, and success. At the Aesthetic Science Institute, I pride myself on providing superior education, and LightStim LED perfectly suits my curriculum.”

Michelle D’Allaird Brenner
 Owner of Aesthetic Science Institute

Our Lovely and Loyal Fans

"It feels like a form of self-love every time I put on some Billie Holiday, light a candle, and apply my face mask and my serums and use my lights. (She's referring to her LightStim kits, which emit multiple wavelengths of light to reduce signs of aging and prevent breakouts.) 'I look at that as self-care.'"

Vanessa Hudgens (Actress) via Women's Health

LightStim is proud to be a Mission Partner with Oncology Spa Solutions and industry icon, Becky Kuehn, to educate skin care professionals on how to safely and effectively serve clients affected by cancer. Becky is an extraordinary master esthetician, author, among the best oncology esthetics educators, and a cancer survivor. She offers her acclaimed classes in many locations across the country.

"There's a thing called the LightStim, which I'm obsessed with at the moment. It's great for collagen and bringing back all the nutrients that you need in your face. I've found it to be a really good thing. My facialist is Shani Darden, so I will go for a facial and then [get] the light over me. I've seen such a big difference in my skin since using it."

Rosie Huntington-Whiteley (Model/Actress) via Beauticate

"I have been using LightStim for the past 2 months about 3-4 times a week and I see a huge difference in my skin. My skin tone and texture has changed and my overall skin looks brighter and healthier."

Monika Blunder (Celebrity Makeup Artist)

"@anthonyanderson and I 'resting our eyes' in the hair/makeup trailer while beautifying! Anthony is working on soft hands and I'm working on collagen production with my amazing @LightStim red light! I swear it tightens the skin and makes me look like I had an extra hour of sleep!"

Tracee Ellis Ross (Actress) via Instagram

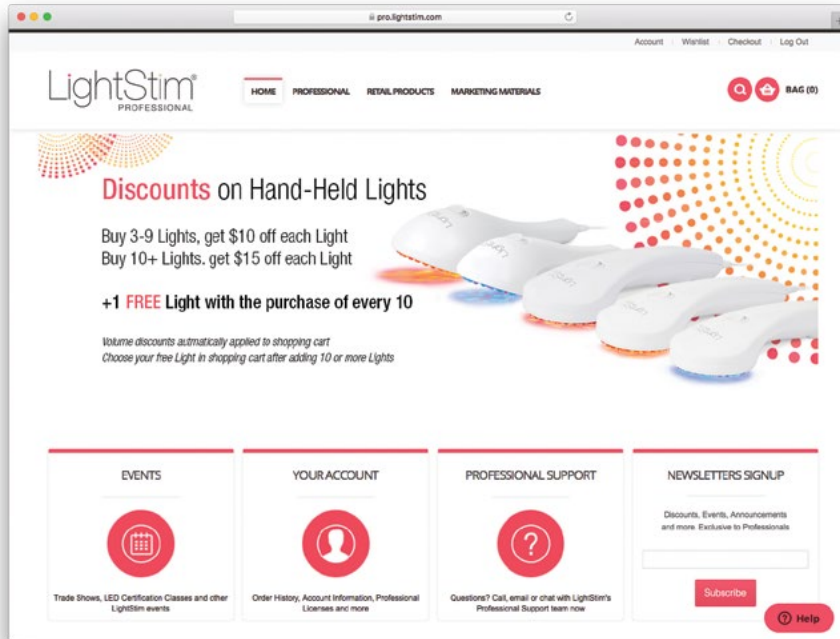

"After much research, I recently incorporated the LightStim LED into my practice working with oncology clients. Here is what I've noticed: The look of pure joy and peace on their faces while they are having the treatment and then their comments afterwards about how their skin looks and feels so much better. They can't wait to come back in for another treatment. Thank you LightStim for making such a wonderful, high quality LED that can and is changing lives in the treatment room."
